The sum of the 3 scores will represent the final score. In the case where 1 adjudicator is of the opinion that an image does not conform to the definition of a specific category, the average point of the remaining 2 adjudicators will represent his/her final score. The judges will receive screen calibration instructions, as well as the official PSSA test calibration application to ensure uniformity in the presentation of images. Where there is indecision about disqualification the judges will take a decision after discussion with the Salon Director. The venue will be the Planetarium at Naval Hill, Bloemfontein.

## **CATEGORY DEFINITIONS:**

**This Salon will be governed by the PSSA definitions and Code of Ethics available on the PSSA website to all. Entrants are encouraged to familiarise themselves with the code of ethics and manipulation rules and guidelines.**

## **DIGITAL MANIPULATION DEFINITION**

Manipulation shall constitute any or all of the following modifications to the original image:

- Adding an element to the image that was not contained in the original capture;
- Removing an element from the image that was contained in the original capture;
- Moving or repositioning an element of the image that was contained in the original capture.

In the categories Nature and Photo Journalism (Sport), manipulation is not allowed. In all other categories, there are no restrictions whatsoever in the way authors choose to post process an image. The following enhancements are allowed, and are not seen as manipulation (as long as the end result is a faithful representation of the original scene):

- Cropping
- Correction of lens distortion, chromatic aberrations, purple fringing, lens vignette and vertical/horizontal perspective adjustments;
- Removal of dust spots or scratch marks from sensor or scanned images;
- The blending of different exposures of the same scene to broaden the dynamic range e.g. High Dynamic Range (HDR);
- Focus stacking to widen the depth of field especially in Macro photography. In the case of Nature and Wildlife HDR and focus stacking will not be considered as manipulation and may therefore be used provided that the end result is a faithful representation of the original scene.
- Photo stacking to overcome the limitations of the digital sensor heat artefacts in exposures

### **Please note:**

HDR and Focus stacking are not allowed in Photojournalism (Sport) and Street Photography.

## **NATURE DEFINITION**

Digital manipulation **IS NOT** allowed in this section.

Entrants warrant that they adhere to the PSSA Nature Photographer's code of ethics and that "The welfare of the subject is more important than the photograph."

Nature photography is restricted to the use of the photographic process to depict all branches of natural history, except anthropology and archaeology, in such a fashion that a well-informed person will be able to identify the subject material and certify its honest presentation.

The story telling value of a photograph must be weighed more than the pictorial quality while maintaining high technical quality.

Human elements shall not be present, except where those human elements are integral parts of the nature story such as nature subjects like barn owls or storks, adapted to an environment modified by humans, or where those human elements are in situations depicting natural forces like hurricanes or tidal waves.

Scientific bands, scientific tags or radio collars on wild animals are permissible.

Photographs of artificially created hybrid plants, cultivated plants, feral animals, domestic animals, or mounted specimens are ineligible, as is any form of manipulation that alters the truth of the photographic statement.

No techniques that add, relocate, replace, or remove pictorial elements except by cropping are permitted. Techniques that enhance the presentation of the photograph without changing the nature story or the pictorial content, or without altering the content of the original scene, are permitted including HDR, focus stacking and dodging/burning. All allowed adjustments must appear natural.

Stitched images are not permitted. Infrared images, either direct-captures or derivations, are not allowed.

Images used in Nature Photography competitions may be divided in two classes: Nature and Wildlife.

Images entered in Nature sections meeting the Nature Photography Definition above can have landscapes, geologic formations, weather phenomena and extant organisms as the primary subject matter. This includes images taken with the subjects in controlled conditions, such as zoos, game farms, botanical gardens, aquariums and any enclosure where the subjects are totally dependent on man for food.

**Wildlife:**

Images entered in Wildlife sections meeting the Nature Photography Definition above are further defined as one or more extant zoological or botanical organisms living free and unrestrained in a natural or adopted habitat.

Landscapes, geologic formations, photographs of zoo or game farm animals, or of any extant zoological or botanical species taken under controlled conditions are not eligible in Wildlife sections.

Wildlife is not limited to animals, birds and insects. Marine subjects and botanical subjects (including fungi and algae) taken in the wild are suitable wildlife subjects, as are carcasses of extant species. Wildlife images may be entered in Nature sections of salons and exhibitions.

## **MONOCHROME DEFINITION**

Monochrome is a black and white image.

A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey. A black and white work toned entirely in a single colour will remain a monochrome work able to stand in the black and white category.

A black and white work modified by a partial toning or by the addition of one colour becomes a colour work (polychrome) to stand in the colour category.

Digital manipulation **is** allowed in this section.
